

Bug Report – Email Validation Issue

Bug ID: BUG-001

Title: Email field accepts invalid numeric email format

Environment:

Website: Sauce Labs Demo Request Form

Company: Sauce Labs

Browser: Google Chrome

Device: Desktop

Steps to Reproduce:

1. Open the Sauce Labs demo request form.
2. In the **Business Email** field enter: [311455@5645.00](#)
3. Fill the other required fields with numeric values.
4. Click the **Let's Talk** button.

Expected Result:

The system should display an error message indicating that the email format is invalid (example: *Please enter a valid email address*).

Actual Result:

The form accepts the invalid email format and submits successfully.

Severity: Medium

Impact:

Invalid data may be stored in the system database, which can affect data quality and communication with users.

Evidence:

Bug Report: Text Becomes Hard to Read on Small Screens

Steps to Reproduce

1. Open the site;
2. Reduce the browser window size using the responsive mode ;
3. Scroll down the page;
4. Observe that some text blocks become cramped or harder to read.

Expected Result

The layout should adjust correctly on smaller screens, keeping all text readable.

Actual Result

Some text blocks appear tight and harder to read when the screen size is small.

Severity

Low
